Welcome to
Your bathroom is in good hands

In the first century B.C. the inhabitants of Pompeii visited baths like this at the Forum at Pompeii not only for reasons of cleanliness, but also to promote their health and maintain social relations. These baths were smaller and thus more private than the big thermal baths, but were just as expensive, yet very artistically designed offering the same high level of comfort: Hot and cold water pools, quiet areas and hot air heating in the floors and walls hidden in all the rooms.

Even in ancient times people recognised the beneficial effect of water and heat: A bath relaxes, refreshes and revives body and soul. Based on this recognition, a bathroom culture with the highest level of comfort has developed and bathrooms are created using the latest technology. Still today the bathroom is a very important part of our quality of life. Therefore, let yourself make your bathroom dream come true - with a dream bathroom from BÄDERWELT.

You can experience the meaning of bathroom culture right from the consultation, selection and planning stages

What does bathroom culture actually mean? The term bathroom culture covers knowledge about the effects of personal hygiene, the practical application of this knowledge and the technical equipment that people have invented, further developed and finally perfected for this.

At BÄDERWELT we show you modern bathroom culture in a wide variety of styles, materials, shapes and colours. Our bathtubs and sanitary ware, fittings, tiling and accessories from the most well-known manufacturers are presented for you in an accomplished display of the highest quality and using the latest technology.

We are equipped for you

Bathtubs and sanitary ware

Is the bathtub comfortable and large enough? Is there enough space for a shower enclosure with a swivel door? Test it for yourself! We exhibit up to 40 sample bathtubs in our showroom.

At the beginning of the 20th century discretion was highly valued. Therefore, bidets and footbaths were hidden away in a cupboard with a built-in washbasin.

On the other hand, people were so proud of technical innovations such as systems for providing and disposing of water that they were virtually put on show.

Have an impression of the variety of design possibilities.

We offer a large selection of sanitary ware, shower enclosures and bathtubs from international manufacturers who are well-known for the most modern production procedures and excellent quality in terms of function and design. The widely diversified product range of the large brands offers you individual solutions for every application with many variation possibilities in terms of material, shape and colour: From the smallest wash basin to the double wash stand installation, from bidets to WC solutions, from the shower enclosure with special flat access to the body form bathtub.

The bathroom - an expression of personality and taste on the one hand, a fundamental part of your quality of life on the other hand. BÄDERWELT offers you a well-balanced overview of styles and design ideas for the bathroom, from a romantic country house style to cool practicality. As you can see from our mini bathroom studio or in our wellness area, there is a range of possibilities from practical detail solutions to exclusive, complete bathrooms.

The basic equipment

Fittings for every style

Water - a building block of life and a precious gift from nature. A shower is like refreshing summer rain, a warm bath is like a thermal source in a famous spa town - without water life is simply not possible. Today our fittings from the best manufacturers combine all the requirements of practical handling and beautiful visual lines.

Crown your bathroom with beautiful, choice fittings.

Is the design of your bathroom nostalgic, sunny and Mediterranean or minimalist and cool? In our showroom we offer you functional and high-value ranges of fittings from well-known manufacturers for any unusual style. From classical twinned wash stand mixer taps in shiny chrome to matte brushed tub fixtures in a sober, formal design, from a gold-coloured two-handle fitting with inlaid enamel work to a sprinkler head with several different massage functions.

Modern fittings stand out not only by the highest quality, large design variety and pleasant manageability, but also by the different materials and processing methods that are used individually or combined with one other in a refined way: metal, acrylic, glass or wood, chrome plated, matte brushed, given a varnished or satin effect - your design wishes know no bounds.

A hint of antiquity can be felt in this bathroom. The floors and the washbasins have been designed with different coloured marble. Decorations and taps made from cast iron round off the antique impression.

Wall and floor design

Tiling and natural stone

Natural stone and tiling bestow upon your bathroom a visual prevailing mood and thus create a background for your bathroom equipment. Shapes and colours, mosaic surfaces and interesting combinations of different substances give your bathroom a classic or modern, clear or playful, minimalist or cosy effect.

Give your bathroom equipment a stylish background.

Large or small tiles, laid straight or diagonally? Made of earthenware, stoneware or natural stone, maybe in combination with glass, wood or stainless steel? As a mosaic with complete or partial borders or marquetry a little like a Rosone?

At BÄDERWELT you can find suitable tiling and natural stone for every design idea and all kinds of bathroom equipment. Often you can also take sample tiles home with you.

You can obtain our tiling and natural stones with various patterns and in various colours and surfaces: unglazed, glazed, coated, polished or water blasted. The latest technology, excellent designs and the best quality are the essential criteria which we use to select our manufacturers. We highly value safe deliveries and after sales guarantee.

A bathroom in an early 19th-century Roman style, completely covered with an exclusive Italian glass mosaic. This is very suitable for encasing both pillars which here contain the heating; steam circulates in them.

Step by step to your new dream bathroom

Different work has to be carried out in the shortest possible time mostly in a small area. Coordination and professional construction are essential for smooth action planning. You can see how this concept works in practice in the following section.

The bathroom - before

Step 1: Consultation & Planning

You discuss your construction plan together with our competent advisers and identify possible ways to implement your ideas. Your adviser is happy to help you by providing an overview of the variety of the product ranges and varieties.

If you already have definite ideas, then we help you to design your new bathroom as a partial or complete bathroom solution. We are also happy to advise you if you would like to carry out certain work and services yourself.

A 3D computerised plan using the actual articles of your choice gives you a good impression of your new bathroom. Each angle can be shown on this model.

Step 2: Construction, consultation & demolition

Often an on-site meeting is also advisable before the work begins in order to check all the details of the construction plan.

After the order has been placed and as soon as all the ordered articles have been delivered to our store, the handcraft coordinator once again agrees the schedule with you in detail. He takes this opportunity to introduce you to the handcraft team.

The handcraft coordinator now coordinates all the work the tradesmen need to carry out. He is your sole contact person. We will take care of the demolition, you do not have to worry about anything because we carry out the demolition work and guarantee the complete, professional removal of the building site rubble.

Step 3: Installation & Handicraft work

The handcraft work proceeds quickly: New water pipes and electrical wiring are laid, front wall systems are built, in-wall pipes and fittings are installed. Finally, the tiles are laid, the sanitary ware is installed, the windows are built in, the paintwork is carried out and the furniture is installed.

Step 4: Final acceptance & Transfer

After completion of all the work and a very detailed verification by the handcraft coordinator, we transfer your new bathroom to you and hope you enjoy it! Because we are only satisfied if you are too.

At regular intervals your handcraft coordinator checks that the progress of the work and the handcraft services are being carried out in accordance with our high BÄDERWELT quality standards so that you are fully satisfied with everything.

Our comprehensive service

A result of many years of experience

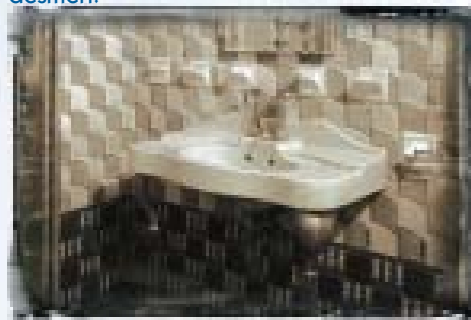

Whether it's a question of renovation or new construction, a partial solution or complete bathroom, several work groups always have to agree with one another. If the responsibility for all the work is held by one company then the costs can be calculated more definitely and the construction time can be kept as short as possible. Your personal handcraft coordinator from BÄDERWELT accepts this responsibility.

Your handcraft coordinator is always a master craftsman with many years of experience in the sanitary field. He is your sole contact person for all your questions and wishes. He coordinates all the work groups and advises you if you would like to carry out certain work yourself. In good time, before the beginning of construction, he shows the tradesmen the work to be done and explains the details. The coordinator accompanies your construction plan until final acceptance and supervises the tradesmen.

He ensures that all the handcraft services are carried out professionally and the schedule is adhered to. If, after completion of the work, something is not right then simply consult your handcraft coordinator. We independently assume all guarantees and warranties for your bathroom.

A typical bathroom from the beginning of the 20th century: A demure and functional style - no more, no less. The particularity here is in the wall tiles that depict a pattern taken from ancient Egypt.

The first BÄDERWELT was opened in Viernheim in 1996. Since then we have drafted and installed over 2500 bathroom solutions. Europe-wide our employees visit the most important trade fairs and regularly present innovations and trends in today over 20 BÄDERWELTs with over 20,000 m² of exhibition area in Germany, Austria and Scandinavia. From the very beginning we have been based on a unique concept for the benefit of our customers: A comprehensive service made by the handcraft coordinator.

Benefit from our singular service concept: The handcraft coordinator.

Set a course

Beautiful and practical accessories

With practical accessories such as a soap dispenser, a hand towel holder or a brush set, your bathroom utensils are always neatly stored and at your finger tips. Style coordinated, manageable and smart solutions for a surprising multitude of applications characterise the comprehensive accessory ranges of well-known manufacturers - from the glass tray to the exclusive cosmetic mirror.

Give your bathroom a completely personal touch with choice accessories.

At BÄDERWELT you can find your completely personal storage items that suit every style. The materials used range from chrome, stainless steel, brass and zinc to acrylic, wood and glass. You can obtain the surfaces in a noble material combination; highly polished, chrome-nickel satin effect, transparent or coloured. Choose your accessories to match your fittings, tiling and your bathroom ware and your bathroom will be a complete reflection of your personality and your taste.

Accessories for the bathroom are simply useful because many small items can be neatly stored in them. Soap, brushes, sponges and further articles for personal hygiene had their firm place in shapely storage areas even at the beginning of the 20th century.

The highest degree of comfort

Wellness & more

Surely you have already once known the beneficial effect of steam baths and massage bubbles - perhaps at a water park or during a comfortable hotel stay. Maybe you also wished to be able to indulge in such a benefit at home and thus at the same time do something good for your health?

Let your bathroom become a source of daily well-being.

Your own bathroom - a wellness oasis! Fitness and a good mood right from the shower! With a shower enclosure, a steam shower or a whirlpool you can do something good for body and soul at home anytime. Water massages and steam baths promote health, foldaway seats, comfortable neck supports and special no-slip coverings ensure your safety and from the built-in stereo system you can listen to your favourite music.

Our advisers are happy to give you information about the application possibilities and equipment details in the wellness area of BÄDERWELT.

Snug warmth is essential for a cosy bathroom. Therefore in our showroom we present you hand towel warmers in noble or sober designs, in different shapes, colours, sizes and with attractive surfaces. They can be installed on the wall or designed as a partition. So, they can be either elegantly integrated into your bathroom equipment or take a prominent place for all to see.

What about a warm floor in winter? Whether by installing flat mats under the floor tiles during renovations or by making a connection to the central heating, we are happy to install floor heating for you.

By comfort people always understand something different. In the 19th century perhaps this bathroom offered the highest level of luxury with material upholstered walls, a soft couch, a carpet and a fireplace.

Your competent partner

We create well-being

Challenge us: with your ideas, your wishes, your bathroom dream.

Again and again we see how intensively our customers accompany every stage of construction. As in a mosaic, the new bathroom stems from an idea and a plan piece by piece.

Every prepared detail is smoothly integrated and the whole gradually changes from pure imagination to a tangible reality. A process that always intrigues our customers and confirms that they have decided on the right partner and have made the right choice from the multitude of design possibilities.

Apart from the quality of the advice, planning and material, our customers in particular trust our diligence, cleanliness and ability to keep to a deadline at the optimal price.

This bathroom was equipped in an opulent way with high gloss finished, rose coloured marble with a black grain. The stone reflects the shapes of water - with a little imagination you can see a bubbling stream, a small waterfall or a quiet pool.

Dreams belong in trustworthy hands

We hope that you enjoyed your journey through bathroom culture. We would be happy to be able to make your bathroom dream come true. We are always open to your ideas, questions and requirements and even after the completion of the work are available for advice and action.

Trust our competence, experience and comprehensive service.
